

Airborne Anthrax: Point of Distribution (POD)

What do I need to do to get medicine for my family?

- Send 1 adult per household to a POD.
- You can find the nearest POD by dialing 2-1-1 or going to www.healthvermont.gov.
- No ID is needed.
- Bring a list of medical information—such as medical conditions or allergies—about each member of your household. Make a note if anyone in your family is pregnant or breastfeeding.
- Bring a list with the age and weight of children in your family so that the right amount of medication can be given to you.

What will happen at the POD?

- **Fill out a short form** listing each person you are picking up medication for.
- **Show the form** to one of the POD staff.
- **Pick up medicine.** A 10-day supply will be given for all family members.
- **Pick up information** about how much medicine to take and how often.
- **Turn in form.**
