

Vermont Asthma Program

The Easy Breathing® Program is an asthma management program for primary care physicians that adheres to the 2007 National Asthma Education and Prevention Program Guidelines and translates them into a standardized approach to managing asthma.

The goal of the program is to improve the health of children with asthma and decrease unnecessary medical services utilization and school absences due to asthma. A user-friendly and evidence-based program, Easy Breathing uses a set of tools to improve recognition of asthma, classification of asthma severity and asthma treatment.

If you know of or are a practice that may want to be involved, please contact Quentin Reynolds:
