Vermont Department of Health

THROUGH: Charlie Gingo, Agency of Human Services
Bennington District Field Director

RE: Investigation Update

DATE: February 16, 2007

The Agency of Agriculture has completed analysis of soil samples for corn herbicides. All samples collected by the Department of Environmental Conservation and by the Agency of Agriculture were analyzed for the following:

- Acetochlor
- Alachlor
- Atrazine
- Dimethenamid
- Metolachlor
- Pendimethalin
- Simazine

In addition, all of the samples collected by the Agency of Agriculture were also analyzed for two DDT metabolites.

NO AMOUNTS of any corn herbicides or any DDT were detected in any of the samples.
