

Chronic Disease in Lamoille County

3-4-50 is a simple concept to help us grasp the reality that 3 health behaviors contribute to 4 chronic diseases that claim the lives of more than 50 percent of Vermonters. This data brief compares these measures of all Vermont adults to adults living in Lamoille County.

3 BEHAVIORS

Lack of physical activity, poor nutrition and tobacco use are three behaviors that contribute to the development and severity of chronic disease. Three out of four adults in Lamoille County do not eat enough fruits and vegetables and one in three do not get the recommended amount of physical activity. One in five Lamoille County adults currently smoke. Lamoille County adults are statistically similar to all Vermont adults in the three key health behaviors.
