

Chronic Disease in the Brattleboro District Office Area

3-4-50 is a simple concept to help us grasp the reality that 3 health behaviors contribute to 4 chronic diseases that claim the lives of more than 50 percent of Vermonters. This data brief compares these measures of all Vermont adults and adults living within the Brattleboro District Office area of Windham County.

3 BEHAVIORS

Lack of physical activity, poor nutrition and tobacco use are three behaviors that contribute to the development and severity of chronic disease. Three out of four adults in the Brattleboro District Office area do not eat enough fruits and vegetables. Two in five adults do not get the recommended amount of physical activity and one in five adults smoke.
